PROFILE INFO

I am a fourth-year Information Technology student at Kasetsart University, Kamphaeng Saen Campus. I am looking for an opportunity to gain real-world experience and improve my practical skills. I am passionate about coding and web development, and I'm always open to learning new things to grow as a developer.

PROJECTS

Create a landing Page

Lob mhum Pathong Restaurant

- Developed a restaurant landing page as a team project.
- Collaborated with UX/UI designers to design and implement a seamless user experience.
- Integrated animations to enhance interactivity and visual appeal.
- Utilized React as the main technology stack for front-end development.

Create a mini Store Ecommerce

Skyshop Store

- Developed an E-commerce website with a focus on clean and user-friendly UI/UX design for online store functionality. Styled the user interface using Tailwind CSS.
- RESTful APIs using Axios to manage product stock, user accounts, shopping carts, order processing, and payment handling via Stripe.
- Implemented database management using Prisma ORM with a MySQL database.

Create a Fullstack website with Next.js

Fatravel

- Developed a travel destination web application using Next.js 15. Designed user interfaces with Shadcn UI components and Tailwind CSS for a modern and responsive layout.
- Implemented Server Actions for backend logic and user authentication/management with Clerk. Utilized features such as Loading, Error handling, dynamic Params, and optimized Image rendering.
- Managed database operations using Prisma ORM with a PostgreSQL database hosted on Supabase.

EDUCATION

BACHELOR DEGREE OF INFORMATION TECHNOLOGY

Kasetsart University Kamphang Saen Campus. Faculty of Liberal Arts and Science

SKILLS

- **Font-End**
  - HTML
  - CSS
  - JavaScript
- **FrameWorks**
  - React
  - Next.js
  - Tailwindcss
  - Express.js
- **Back-End**
  - Nodejs
  - RestAPI
- **Database**
  - Mysql
  - postgresql

TOOLS

- Visual Studio Code
- Docker Desktop
- Postman
- DBeaver
- Figma
- Git
